

Green Supply Chain Monthly Report

2024-02

Suppliers Disclosed 960,000 Tons of Carbon, Motivated by M&S, Target, Inditex, and others

In February 2024, through its engagement in environmental and climate action, IPE witnessed 59 enterprises disclosing a total of 61 carbon emission data sheets, and 82 enterprises disclosing a total of 82 PRTR (Pollutant Release and Transfer Register) data sheets. In addition, 76 enterprises passed the GCA audit, verifying the effectiveness of their corrective actions, which led to the removal of 294 supervision records from the Blue Map website.

Dual Carbon Actions

In the past month, the total carbon emissions disclosed through the Blue Map reached 962.5 thousand tons of CO₂e. These emissions were reported by 59 enterprises across 12 industries (see Figure 1 for emission distribution ranges, and Figures 2 and 3 for the distribution of enterprises and emissions by industry).

We believe that brands are motivating key suppliers to accurately calculate and disclose their carbon data, extending this influence further upstream to unlock

emission reduction potential through the supply chain. This reflects the efforts brands are making to promote green supply chains. At the same time, enterprises' voluntary disclosure of carbon emissions from their own operations (Scope 1+2) demonstrates their commitment to environmental and social responsibility - a practice worthy of full recognition.

Among the enterprises that disclosed carbon data in the past month:

- 55 enterprises used the Corporate GHG Emissions Accounting Platform developed by Blue Map to calculate their greenhouse gas emissions.
- 2 enterprises completed third-party verification and uploaded verification reports. Of these, 1 enterprises are from the computer, communication, and other electronic equipment manufacturing industry, and 1 from the chemical raw materials and chemical products manufacturing industry.
- 1 enterprises calculated and disclosed Scope 3 (value chain) emissions in addition to Scope 1+2 (own operations) emissions.
- 25 enterprises have set carbon reduction targets. Among them, 13 enterprises set absolute reduction targets with a total target reduction of approximately 10,196.03 tons of CO₂e; 12 enterprises have set intensity reduction targets.
- The main industries involved include textile-related industries, the textile industry, textile and apparel, the apparel industry, as well as the computer, communication, and other electronic equipment manufacturing industries. Among these, 34 enterprises from the textile industry and textile, apparel,

and accessory industry reported a total emission of 612.4 thousand tons of CO₂e; 8 enterprises from the leather, fur, feather products and footwear industry reported a total emission of 46.3 thousand tons of CO₂e.

Brand Green Actions

Driven by 27 brands, a total of 70 suppliers have provided explanations on violation records and/or rectification status over the past month. Motivated by 46 brands, 242 suppliers have been in the process of calculating/reporting carbon emissions, pollutant discharges, and resource consumption data over the past month, and have communicated with IPE and provided confirmation. Independent from brands' requirements, 88 upstream suppliers have provided explanations on violation records and/or rectification status, and 58 enterprises have undertaken the calculation/reporting work and are currently in the process of communicating with IPE and providing confirmation.
