

Green Supply Chain Monthly Report 2024-03

Motivated by Textile and Retail Brands, Suppliers Disclosed 3.73 Million Tons of Carbon

In March 2024, through its engagement in environmental and climate action, IPE witnessed 203 enterprises disclosing a total of 211 carbon emission data sheets, and 246 enterprises disclosing a total of 257 PRTR (Pollutant Release and Transfer Register) data sheets. In addition, 166 enterprises passed the GCA audit, verifying the effectiveness of their corrective actions, which led to the removal of 562 supervision records from the Blue Map website.

Dual Carbon Actions

In the past month, the total carbon emissions disclosed through the Blue Map reached 3,736.6 thousand tons of CO₂e. These emissions were reported by 203 enterprises across 20 industries (see Figure 1 for emission distribution ranges, and Figures 2 and 3 for the distribution of enterprises and emissions by industry).

We believe that brands are motivating key suppliers to accurately calculate and

disclose their carbon data, extending this influence further upstream to unlock emission reduction potential through the supply chain. This reflects the efforts brands are making to promote green supply chains. At the same time, enterprises' voluntary disclosure of carbon emissions from their own operations (Scope 1+2) demonstrates their commitment to environmental and social responsibility - a practice worthy of full recognition.

Among the enterprises that disclosed carbon data in the past month:

- 193 enterprises used the Corporate GHG Emissions Accounting Platform developed by Blue Map to calculate their greenhouse gas emissions.
- 7 enterprises completed third-party verification and uploaded verification reports. Of these, 2 enterprises are from the computer, communication, and other electronic equipment manufacturing industry; 1 from the electrical machinery and equipment manufacturing industry; 1 from the metal products industry; 1 from the textile, apparel, and accessory industry; 1 from chemical fiber manufacturing industry and 1 from the rubber and plastic products industry.
- 6 enterprises calculated and disclosed Scope 3 (value chain) emissions in addition to Scope 1+2 (own operations) emissions.
- 73 enterprises have set carbon reduction targets. Among them, 42 enterprises set absolute reduction targets with a total target reduction of approximately 83.1 thousand tons of CO₂e; 33 enterprises have set intensity reduction targets, and 2 enterprises have set absolute reduction targets and

intensity reduction targets simultaneously.

- The main industries involved include textile-related industries, the textile industry, textile and apparel, the apparel industry, as well as the chemical fiber manufacturing industries. Among these, 103 enterprises from the textile industry and textile, apparel, and accessory industry reported a total emission of 2,403.8 thousand tons of CO₂e; 5 enterprises from the chemical fiber manufacturing industry reported a total emission of 556.9 thousand tons of CO₂e.

Brand Green Actions

Driven by 35 brands and 1 bank, a total of 146 suppliers have provided explanations on violation records and/or rectification status over the past month. Motivated by 55 brands, 702 suppliers have been in the process of calculating/reporting carbon emissions, pollutant discharges, and resource consumption data over the past month, and have communicated with IPE and provided confirmation. Independent from brands' requirements, 158 upstream suppliers have provided explanations on violation records and/or rectification status, and 99 enterprises have undertaken the calculation/reporting work and are currently in the process of communicating with IPE and providing confirmation.
