

# **Green Supply Chain Monthly Report**

## **2025-06**

### **Suppliers Disclose Nearly 10 Million Tons of Carbon, Motivated by Two Chinese Brands and Others**

---

In June 2025, through its engagement in environmental and climate action, IPE witnessed 622 enterprises disclosing a total of 625 carbon emission data sheets, and 642 enterprises disclosing a total of 660 PRTR (Pollutant Release and Transfer Register) data sheets. In addition, 170 enterprises passed the GCA audit, verifying the effectiveness of their corrective actions, which led to the removal of 485 supervision records from the Blue Map website.

### **Dual Carbon Actions**

In the past month, the total carbon emissions disclosed through the Blue Map reached 9.9287 million tons of CO<sub>2</sub>e. These emissions were reported by 28 enterprises across 622 industries (see Figure 1 for emission distribution ranges, and Figures 2 and 3 for the distribution of enterprises and emissions by industry).

We believe that brands are motivating key suppliers to accurately calculate and disclose their carbon data, extending this influence further upstream to unlock

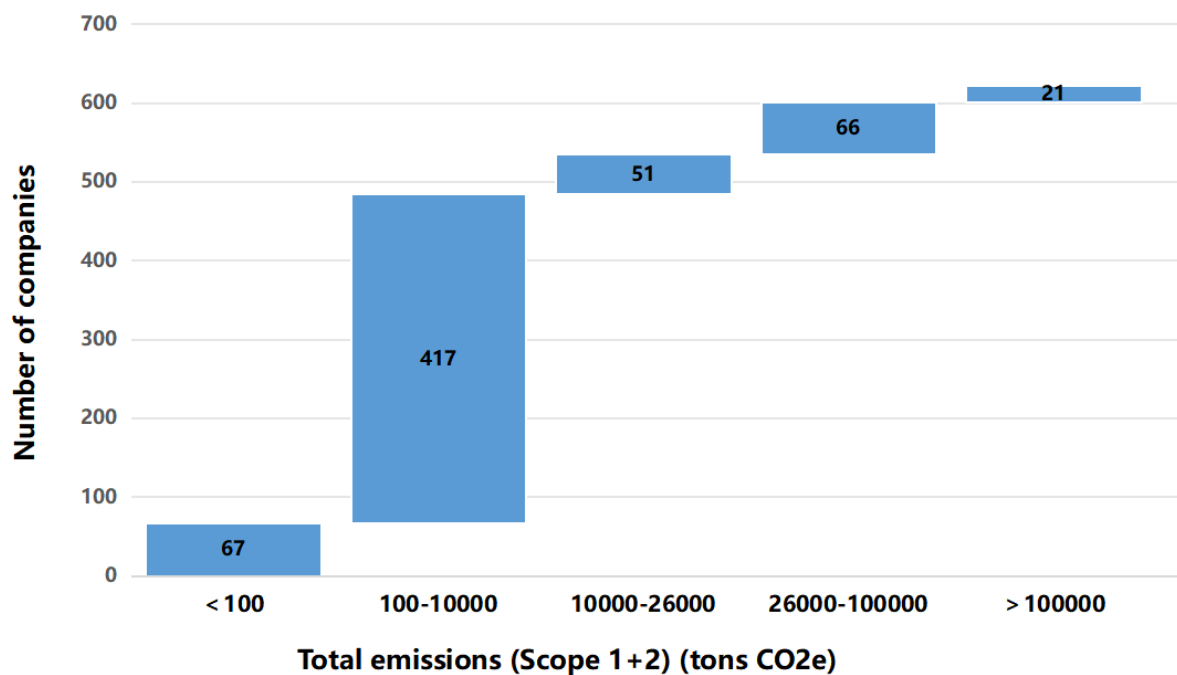

emission reduction potential through the supply chain. This reflects the efforts brands are making to promote green supply chains. At the same time, enterprises' voluntary disclosure of carbon emissions from their own operations (Scope 1+2) demonstrates their commitment to environmental and social responsibility - a practice worthy of full recognition.

Among the enterprises that disclosed carbon data in the past month:

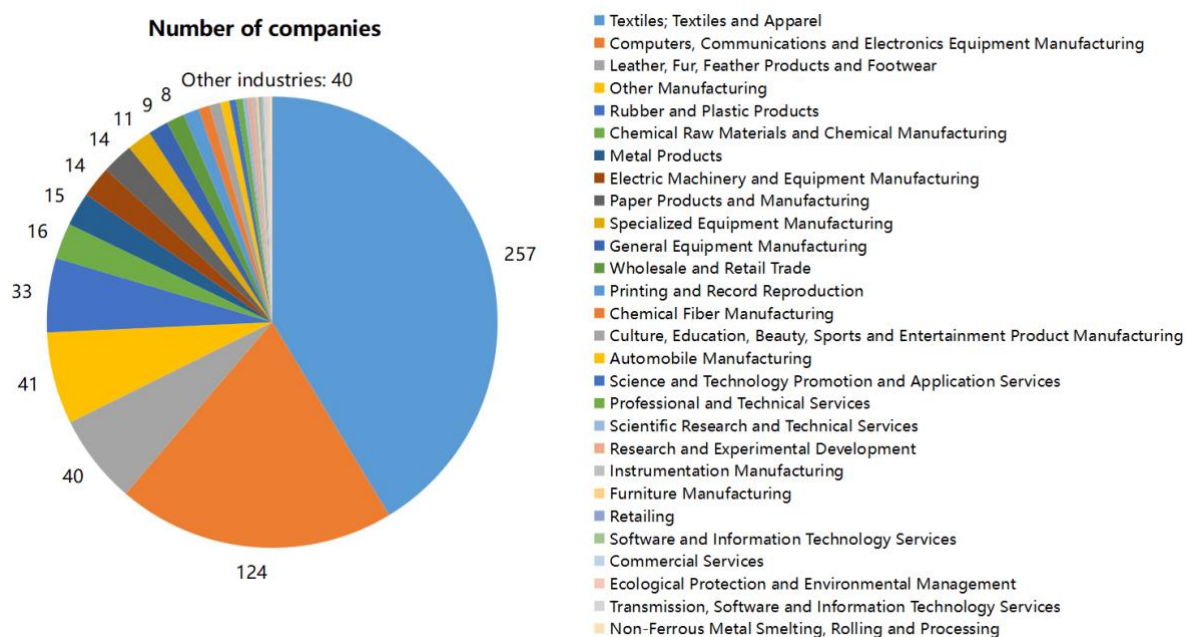

- 474 enterprises used the Corporate GHG Emissions Accounting Platform developed by Blue Map to calculate their greenhouse gas emissions.
- 124 enterprises completed third-party verification and uploaded verification reports. Of these, 68 enterprises were from the Computers, Communications and Electronics Equipment Manufacturing; 10 from the Other Manufacturing; 7 from the Textiles; Textiles and Apparel; 7 from the Metal Products; 5 from the Electric Machinery and Equipment Manufacturing; 5 from the Rubber and Plastic Products; 4 from the Automobile Manufacturing; 4 from the Specialized Equipment Manufacturing; 2 from the Scientific Research and Technical Services; 2 from the Leather, Fur, Feather Products and Footwear; 2 from the General Equipment Manufacturing; 2 from the Paper Products and Manufacturing; 1 from the Chemical Raw Materials and Chemical Manufacturing; 1 from the Software and Information Technology Services; 1 from the Commercial Services; 1 from the Transmission, Software and Information Technology

Services; 1 from the Research and Experimental Development; 1 from the Printing and Record Reproduction.

- 18 enterprises calculated and disclosed Scope 3 (value chain) emissions in addition to Scope 1+2 (own operations) emissions.
- 221 enterprises have set carbon reduction targets. Among them, 180 enterprises set absolute reduction targets with a total target reduction of approximately 2.6512 million tons of CO<sub>2</sub>e; 44 enterprises have set intensity reduction targets.
- The main industries involved include Computers, Communications and Electronics Equipment Manufacturing, as well as the textile-related industries, the textile industry, textile and apparel, the apparel industry. Among these, 124 enterprises from the Computers, Communications and Electronics Equipment Manufacturing reported a total emission of 3.5771 million tons of CO<sub>2</sub>e; 257 enterprises from the textile-related industries, the textile industry, textile and apparel, the apparel industry reported a total emission of 3.0150 million tons of CO<sub>2</sub>e.

**Total emissions of the industry (Scope 1 + 2) (ten thousand CO<sub>2</sub>e)**

**Figure 3 Distribution of GHG Emissions (Scope 1 + 2) by Industry**

## Brand Green Actions

Driven directly or indirectly by 34 brands and 1 bank, a total of 158 suppliers have provided explanations on violation records and/or rectification status over the past month. Motivated directly or indirectly by 68 brands, 1087 suppliers have been in the process of calculating/reporting carbon emissions data over the past month. Motivated directly or indirectly by 56 brands, 894 suppliers have been in the process of calculating/reporting PRTR data over the past month. Independent from brands' requirements, 143 upstream suppliers have provided explanations on violation records and/or rectification status, and 230 enterprises have been in the process of calculation/reporting work.
